PROFESSIONAL PROFILE

Computer Science graduate and IT professional with hands-on experience in software development, hardware engineering, ICT infrastructure, digital transformation, database administration, website deployment, CCTV surveillance, biometric attendance systems, media production, digital communications and end-user technical support. Formal professional experience includes IT responsibilities with Aqoonmaal Construction & Transportation Company, IT responsibilities with GreenVolt Energy Solutions Company, and ICT Assistant responsibilities with Horn of Africa Aid and Rehabilitation Action Network (HAARAN). Across these roles, he supported staff desktops and laptops, printers, projectors, presentation screens, CCTV systems, peripherals, operating systems and business applications, while providing software installation, configuration, maintenance, troubleshooting and user support. In parallel, he has delivered independent ICT consulting and web-development assignments for government institutions, private companies and local NGOs, including professional websites, digital systems, assessments and interactive dashboards.

PROFESSIONAL EXPERIENCE

IT Specialist | Aqoonmaal Construction & Transportation Company

15 Apr 2026 - 5 Aug 2026

- Managed and supported the company's day-to-day ICT environment, providing practical hardware, software and end-user technical support for office operations.
- Installed, configured, maintained and troubleshot staff desktops, laptops, printers, projectors, presentation screens, CCTV equipment, peripherals and other office ICT devices.
- Performed operating-system and application installation, software updates, user and device configuration, connectivity troubleshooting, peripheral integration and preventive maintenance.
- Supported staff in resolving hardware, software, printing and connectivity issues, helping maintain reliable and efficient use of the company's technology resources.
- Supported the company's website and digital operations as part of broader ICT responsibilities.

INDEPENDENT ICT CONSULTING & DIGITAL DEVELOPMENT PROJECTS

The following assignments were delivered independently on a project/consultancy basis. They represent agreed ICT development engagements and should not be interpreted as staff employment within the client organizations.

Ministry of Planning, Investment and International Cooperation - Jubaland State

Independent Digital Systems Consultant / Lead Developer

- Leading the development and integration of the Ministry's official frontend website, the Jubaland Aid Information Management System (JAIMS), and the Organization Registration and Registry System.
- Integrating project management, organization registration, document management, reporting and public-service workflows into a coordinated digital ecosystem intended to improve data consistency, operational efficiency and service delivery.
- Development status: the systems and frontend website are under active development and local testing and are not yet publicly published.

Ministry of Fishery & Blue Economy - Jubaland State

Independent Web Development Consultant

- Designed and developed the Ministry's website as an independent digital-development assignment to improve institutional visibility, public communication and access to sector information.

https://mofisheriesbe-frontend.vercel.app/
