PROFESSIONAL PROFILE

Computer Science graduate and IT professional with hands-on experience in software development, hardware engineering, ICT infrastructure, digital transformation, database administration, website deployment, CCTV surveillance, biometric attendance systems, media production, digital communications and end-user technical support. Formal institutional experience includes IT Specialist responsibilities with the Ministry of Energy & Water Resources of Jubaland State, Head of Communications responsibilities with the Office of the First Deputy President of Jubaland State, and ICT Assistant responsibilities with Horn of Africa Aid and Rehabilitation Action Network (HAARAN). Across these roles, he supported staff computers, laptops, printers, projectors, presentation screens, cameras, CCTV systems and other office ICT equipment while also contributing to digital content, media coverage and communication operations. In parallel, he has delivered independent ICT consulting and web-development assignments for government institutions, private companies and local NGOs, including more than twelve professional websites, major digital systems, assessments and interactive dashboards.

PROFESSIONAL EXPERIENCE

IT Specialist | Ministry of Energy & Water Resources, Jubaland State

15 Apr 2026 - 5 Aug 2026

- Managed and supported the Ministry's ICT environment, combining software development, hardware support, website administration, hosting and digital-system implementation.
- Designed, developed and maintained the Ministry's official website, including frontend and backend development, database integration, domain configuration, hosting deployment and ongoing technical administration.

<https://moewr-jubalandstate.so/>

- Developed the Energy Mapping Assessment interactive dashboard, transforming sector assessment data into visual maps, charts and indicators for planning, monitoring and reporting.

https://moewr-jss.shinyapps.io/Moewr_jss/

- Developed the Water Resources Assessment interactive dashboard to present water-sector data and indicators through accessible visual reporting and decision-support tools.

https://fy4z9s-mayow-cabdiqadir.shinyapps.io/jls_ws/

- Installed and configured the Ministry's CCTV surveillance infrastructure consisting of eight (8) security cameras and two (2) monitoring screens, including system testing and operational setup.

Professional Graphic Design

Sodma Academy,
30 Dec 2023- 10 March 2024

Full-Stack Development Certificate

Kaafiya Technology Center
may 2023 – October 2023

Secondary School Certificate

Hoyga Midnimo Secondary School, Mandera
2018 – 2022

LANGUAGES

- Somali
- English
- Kiswahili

- Installed and configured the biometric fingerprint attendance system, enrolled staff users and supported digital attendance tracking and reporting.
- Provided comprehensive hardware and software ICT support to Ministry staff, including installation, configuration, maintenance and troubleshooting of desktops, laptops, printers, projectors, presentation screens, CCTV equipment, peripherals, operating systems and office applications.
- Performed user setup, device configuration, software installation, connectivity troubleshooting, peripheral integration and preventive maintenance to ensure reliable day-to-day ICT operations across the Ministry.

Head of Communications | Office of the First Deputy President - Jubaland State of Somalia

5 Feb 2026 - 10 Apr 2026

- Led and supported the Office's communications and media activities, helping document and communicate official meetings, events, field activities and public engagements through coordinated digital and visual content.
- Provided media-production support using digital cameras and related equipment for photography and video coverage, and prepared meeting footage, short videos and other visual materials for official communication and broadcast use.
- Produced and supported digital designs, graphics, presentation materials and other communication assets used for meetings, public information, institutional visibility and media dissemination.
- Supported recording, editing, preparation and organization of meeting videos and broadcast materials, including setup of cameras, projectors, presentation screens and audio-visual equipment for official sessions and events.
- Provided comprehensive hardware and software ICT support to office staff, including configuration, maintenance and troubleshooting of desktops, laptops, printers, cameras, CCTV equipment, projectors, presentation screens, peripherals, operating systems, office applications and other ICT systems; also handled software installation, device setup, connectivity troubleshooting and day-to-day user support.

ICT Assistant | Horn of Africa Aid and Rehabilitation Action Network (HAARAN)

Sep 2025 - Dec 2025

- Provided organization-wide hardware and software ICT assistance to staff, including setup, maintenance and troubleshooting of desktops, laptops, printers, projectors, presentation screens, CCTV equipment, peripherals, operating systems and office applications.
- Supported staff in resolving hardware, software, printing, connectivity and device-configuration issues, including software installation, user setup, peripheral integration and preparation of ICT equipment for meetings, presentations and daily programme operations.
- Conducted routine configuration, testing and preventive maintenance of ICT equipment to improve reliability, availability and staff productivity.

- Developed and supported the organization's website to strengthen programme communication, institutional visibility and access to organizational information.
